Let's Celebrate November

- 7 Nov Object Talk Competition
- 8 Nov CCA GK
- 10 Nov Pencil Shaving Activity

"EVERY MONTH AT SANSKRITI KIDS BRINGS A NEW STORY OF LEARNING, LAUGHTER, AND LIMITLESS POSSIBILITIES. STEP INTO THIS EDITION TO CELEBRATE THE LITTLE VICTORIES AND BIG DREAMS OF OUR STUDENTS."

"Curtains are rising, rehearsals are rolling—Annual Day fever has begun at Sanskriti Kids!"

- 14 Nov Children's Day
- 19-20 Nov Transportation week
- 14 Nov Bagless Day/Little Chef Activity
- 14 Nov PTM

Object Talk

An object talk competition is a fantastic educational activity for pre-primary children, offering numerous benefits that extend beyond the classroom. By participating in these competitions, young learners develop crucial communication skills as they articulate their thoughts and ideas about a particular object. This activity encourages creativity and enhances vocabulary as children learn to describe and explain various objects in detail. Furthermore, it boosts their confidence by providing a platform to speak in front of an audience, which is essential for their personal growth and social development. Object talk competitions also foster critical thinking and curiosity, as children learn to observe and understand the significance of everyday objects in their environment. Overall, these competitions lay a strong foundation for effective communication and cognitive skills, setting the stage for future academic success.

CCA GK

QUIZ TIME

Inter House Competition

The Inter-House general knowledge quiz competition between Agni, Vaari, Prithvi, and Akash houses was an exciting and intellectually stimulating event. Each house team comprised enthusiastic and well-prepared participants, eager to showcase their knowledge across various domains. The quiz master, with a keen sense of timing and engagement, fired off questions that spanned history, science, current affairs, and more, challenging the contestants' breadth of understanding and quick thinking. The atmosphere was charged with anticipation as each correct answer was met with applause and cheers from the respective house supporters. The competition not only fostered a spirit of camaraderie and healthy rivalry but also encouraged participants to delve deeper into learning and staying informed about the world around them. In the end, while one house emerged victorious, all participants walked away with a sense of accomplishment and a richer knowledge base.

Activity

The inter-house general knowledge quiz competition between Agni, Vaari, Prithvi, and Akash houses was an exciting and intellectually stimulating event. Each house team comprised enthusiastic and well-prepared participants, eager to showcase their knowledge across various domains. The quiz master, with a keen sense of timing and engagement, fired off questions that spanned history, science, current affairs, and more, challenging the contestants' breadth of understanding and quick thinking. The atmosphere was charged with anticipation as each correct answer was met with applause and cheers from the respective house supporters. The competition not only fostered a spirit of camaraderie and healthy rivalry but also encouraged participants to delve deeper into learning and staying informed about the world around them. In the end, while one house emerged victorious, all participants walked away with a sense of accomplishment and a richer knowledge base.

Children's Day

Children's Day at Sanskriti Kids was an enchanting celebration, infused with the glamour and vibrancy of Bollywood and Tollywood dress-up styles. The young ones, clad in colorful costumes inspired by the cinematic worlds of Mumbai and Hyderabad, brought a festive spirit to the event. Adding to the day's excitement were special guests, Ms. Mahima Sagar and Ms. Ananya, who, despite not hailing from the film industries, graced the occasion with their presence, much to the delight of the children and teachers alike. The highlight of the day was a captivating skit performed by the teachers, who showcased their talent through various performances, leaving the young audience mesmerized and inspired. The event was a beautiful blend of fun, culture, and creativity, making it a memorable experience for everyone involved.

Mini Marvels

In this month's edition of the Mini Marvel Chat Show, the lively topic of discussion was "From Lunchtime to Homework Time." The conversation explored how children transition from the midday break to their afternoon study sessions, and featured insights from educators Ms. Swati Gupta and Ms. Madhuri. They were joined by the Mini Marvels—Shourya, Lasya, and Shradha Sree—who shared their personal experiences on managing this crucial part of their day. The educators provided valuable tips on maintaining energy levels and focus after lunch, while the Mini Marvels offered candid insights into what motivates them to tackle their homework. Together, they painted a comprehensive picture of how to make the most of this time, balancing relaxation and productivity for an effective learning experience.

Transportation Week

Organizing a Transportation Week for preprimary children was an exciting way to introduce them to different modes of transport. An engaging and educational experience was created by incorporating small models and toys that represented land, air, and water transportation. For land transport, toy cars, trains, and buses were used. A mini roadway or train track was set up for children to explore. For air transport, model airplanes and helicopters were included, with some hanging from the ceiling to simulate flight. Water transport was represented with toy boats and ships, which were floated in a small water table or pool. Throughout the week, activities such as storytime with transportation-themed books, arts and crafts projects where children created their own transport models, and interactive games encouraged learning about the different functions and characteristics of each transport type. This hands-on approach not only made learning fun but also helped young children understand the diverse ways we traveled across land, air, and water.

Little Chef Corner

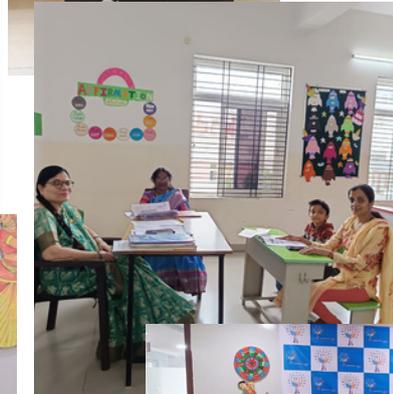

This month at school, the Little Chef activity was a delightful journey into the past with the preparation of Bhel Puri, a snack known for its vibrant taste and health benefits. Bhel Puri, a beloved Indian street food, is celebrated for its tangy and spicy flavors, making it an exciting choice for young chefs eager to explore the art of blending tastes and textures. The dish, primarily composed of puffed rice, sev, and a medley of vegetables such as tomatoes, onions, and boiled potatoes, offers as much fun in its preparation as in its consumption. The inclusion of tamarind chutney and a dash of chaat masala enhances its taste, capturing the hearts of children and adults alike. This activity not only sparks creativity in the kitchen but also imparts valuable lessons on the importance of incorporating healthy ingredients into meals.

PTM

The recent Parent-Teacher Meeting (PTM) at Sanskriti Kids was a truly memorable event, underscoring the importance of collaboration between parents and teachers in a child's education. A special Halloween photobooth added a fun and festive atmosphere, allowing kids and parents to capture spooky and delightful memories. The "Mode of Transport Alive Model Display" offered an engaging and educational experience, showcasing various modes of transport interactively. Additionally, the "Incredible India" display for the 5th Annual Day celebration was a fantastic opportunity to highlight India's rich and diverse cultural heritage. Overall, this event was thoughtfully organized to blend education with entertainment, making it enjoyable for everyone involved.

INTER-SCHOOL COMPETITION

Congratulations to our school for its outstanding achievement at the Eco Innovations Robotics Challenge! Scoring a perfect 20/20 among 25 participating schools was an exceptional accomplishment, highlighting the dedication and talent of our team. Winning in such a competitive environment showcased not only the technical skills and creativity of our participants but also the collaborative spirit and problem-solving abilities essential in robotics competitions. This victory was a testament to the hard work we all put in and served as an inspiring example for other students pursuing excellence in STEM fields. A special mention goes to the Sanskriti Smart Reaper project, which was the main project and played a pivotal role in our success. Well done to everyone involved!
